SUMMARY

Computer Science student (B.S., December 2026) seeking entry-level cybersecurity and IT roles. Hands-on experience deploying and hardening on-premise infrastructure and providing end-user technical support at a public water utility. CompTIA A+ and Network+ certified; CompTIA Security+ in progress (exam December 2026).

EDUCATION

Westminster University, Salt Lake City, UT 2024 – Dec 2026
Bachelor of Science in Computer Science, Minor in Mathematics | GPA: 3.9 | Dean's List

Massachusetts Bay Community College 2023 – 2024
Associate in Computer Science | GPA: 3.8 | Dean's List

CERTIFICATIONS

CompTIA Network+ | CompTIA | Earned Oct 2026 | Verify on Credly
CompTIA A+ | CompTIA | Earned Aug 2026 | Verify on Credly
CompTIA Security+ (SY0-801) | CompTIA | In Progress, Expected Dec 2026

EXPERIENCE

IT Intern Jun 2026 – Present
Metropolitan Water District of Salt Lake & Sandy, Cottonwood Heights, UT

- Provision and configure staff laptops and desktops, including operating system setup, Active Directory domain joining, and VPN client configuration.
- Resolve help desk tickets across hardware, software, and network issues for district staff.
- Deployed and configured an on-premise server hosting an internal AI tool, giving staff self-service access to organizational information.

Front Desk Assistant Oct 2024 – Present
Student Engagement and Belonging, Westminster University, Salt Lake City, UT

- Provide administrative support including phones, scheduling, and email while handling confidential student records.
- Coordinate appointments and events across multiple campus departments.

PROJECTS

On-Premise AI Assistant | Metropolitan Water District | Infrastructure & Security Summer 2026

- Deployed a network-contained Linux server on a segmented network with no OT/SCADA connectivity, keeping all district data on premises.
- Hardened the system with a TLS-terminating reverse proxy, internal certificate authority (CA) certificates, and firewall rules scoped to a single port.
- Designed read-only service accounts and least-privilege integration paths to financial and asset-management systems.

Proxmox Security Homelab | Personal Project | Networking & Security Fall 2026

- Built a Proxmox VE virtualization lab running an OPNsense firewall, AdGuard Home DNS filtering, and Uptime Kuma service monitoring.
- Segmented a lab subnet behind OPNsense with a tested block rule to the home LAN; limited remote access to Tailscale VPN only.

SKILLS

Security: Network segmentation, firewall configuration, TLS/PKI and internal CA, least-privilege access design, endpoint hardening, air-gapped deployment, vulnerability scanning
IT & Systems: Active Directory/LDAP, Windows Server, Linux, Docker, DNS, VPN, reverse proxies, RDS/RemoteApp, help desk support, hardware and software troubleshooting
Tools: Wireshark, Nmap/Zenmap, tcpdump, OpenVAS, Windows Event Viewer, Sysinternals, Proxmox VE, OPNsense
Languages: Python, Bash, SQL, C#, JavaScript, Java
