CS student (B.S. expected Fall 2026) focused on security engineering and systems infrastructure. Hands-on experience hardening on-premise systems for a public water utility. CompTIA A+, Network+ certified; Security+ in progress

EDUCATION

Westminster University 2024 - Fall 2026 (Expected)
B.S. Computer Science, Minor in Mathematics • GPA: 3.9 • Dean's List

Massachusetts Bay Community College 2023 - 2024
Associate in Computer Science • GPA: 3.8 • Dean's List

CERTIFICATIONS

CompTIA A+ | Network+ | Security+ (in progress, exp. December 2026)

SKILLS

Security & Infrastructure: Network segmentation, TLS/PKI and internal CA, least-privilege access design, Active Directory/LDAP, air-gapped deployment, endpoint hardening
Systems & Networking: Linux, Windows Server, Docker, reverse proxies, DNS, firewall configuration, RDS/RemoteApp
Tools: Wireshark, Nmap/Zenmap, tcpdump, Windows Event Viewer, Sysinternals, OpenVAS
Languages: Python, Bash, SQL, C#, JavaScript, Java

PROJECTS

On-Premise AI Assistant - *Metropolitan Water District* Summer 2026
Independent Project - Infrastructure & Security

- Deployed a network-contained Linux server on a segmented network with no OT/SCADA connectivity, keeping all district data on premises.
- Hardened the system with a TLS-terminating reverse proxy, internal CA certificates, and firewall rules scoped to a single port.
- Designed read-only service accounts and least-privilege integration paths for financial and asset-management systems.

Utah Independent Living Center Website Spring 2026
Team Project - Web Applications

- Built and developed a website for a nonprofit using Next.js, React, TypeScript, and Tailwind CSS.
- Developing shared accessible components and page sections using professional Git workflows and code review.

EXPERIENCE

IT Intern - Metropolitan Water District of Salt Lake and Sandy June 2026 - Present
Cottonwood Heights, UT

- Provisioned and configured laptops and desktops for staff, including OS setup, domain joining, and VPN client configuration
- Resolved IT support tickets across hardware, software, and network issues
- Deployed and configured an on-premise server to host an internal AI tool, giving staff self-service access to organizational information
- Gained hands-on experience with enterprise systems administration and networking for a public utility organization

Front Desk Assistant - Students Engagement and Belonging, Westminster University Oct 2024 - Present
Salt Lake City, *UT*

- Provided administrative support: phones, scheduling, emails, and confidential student records.
- Coordinated appointments and events across multiple departments.
