PROJECTS

[AI Park Ranger](#) — VR Capstone Project

Spring 2026

Individual Project — Software Engineering

- Developed a VR experience in Unity and C# set in Zion National Park with an AI-powered park ranger guide.
- Integrated the OpenAI API for real-time dialogue with interactive triggers on plants, wildlife, and terrain.

[Utah Independent Living Center Website](#)

Spring 2026

Team Project — Web Applications

- Building a website for a nonprofit using Next.js, React, TypeScript, and Tailwind CSS.
- Developing shared accessible components and page sections using professional Git workflows and code review.

[Math Adventure](#)

Spring 2025

Team Project — Software Engineering

- Created adaptive mini games for an elementary classroom that adjust difficulty dynamically.
- Built server-side analytics to track student progress and participation.

SKILLS

Languages: Python, C#, R, JavaScript, TypeScript, SQL, Java

Tools & Frameworks: Unity, React, Next.js, Flask, Django, Tailwind CSS, OpenAI API, Git, Tableau

Databases: SQLite, MySQL, MariaDB
